GraphOn Signs ISV Partnership Agreement with M-Power Software
GO-Global Powers Web-enabled Access to Silent Manager ERP Application

SANTA CRUZ, CA, USA – March 3, 2008 – GraphOn Corporation (OTCBB: GOJO.OB), a leading worldwide developer of application publishing and Web-enabling software solutions, today announced that it has signed an independent software vendor (ISV) agreement with Melbourne, Australia-based M-Power Software. M-Power will resell GraphOn's GO-Global software to Web-enable its Windows-based Silent Manager enterprise resource planning (ERP) system for small- to medium-sized manufacturing companies.

"We found that GO-Global's simple and secure interface offers many advantages over Microsoft Windows Terminal Server, eliminating the need for smaller customers to initiate costly and complex changes to their IT infrastructure," explained Nigel Davies, Managing Director at M-Power. "It lets us Web enable our product without the need for significant investment."

GO-Global is a fast and affordable remote application delivery solution that provides easy, Web-enabled access to centrally-running applications from any platform and operating system. With GO-Global, there is no need to modify existing applications for the Web or deploy complex infrastructure such as Microsoft Windows Terminal Server or Citrix.

"As a result of this ISV agreement, M-Power instantly creates a Web-enabled ERP manufacturing solution that will help them penetrate a large target market not well served today by existing ERP systems," said Tom Castanzo, GraphOn's Business Development Director. "We are quite pleased to announce this mutually-beneficial partnership."

"Our partnership with GraphOn is an important one for M-Power Software and for our customers," continued Davies. "It allows our clients to benefit from the significant advantages of the GO-Global product, while backed by the strength and support of a world-leading company in thin-client innovation."

About M-Power Software
With corporate headquarters in Melbourne, Australia, M-Power Software specializes in helping companies improve manufacturing to drive future growth. Guided by the principles of ISO9001:2000 and lean manufacturing, the company's Silent Manager ERP system provides powerful and flexible tools for manufacturing companies to monitor, control, and improve production systems and workflow.
