GraphOn Enters into OEM Partnership with Datasul

GO-Global Will Web-enable Datasul's Entire Portfolio of Business Software Solutions

SANTA CRUZ, CA, USA – December 10, 2007 – GraphOn Corporation (OTCBB: GOJO.OB), a leading worldwide developer of thin-client application publishing and Web-enabling software solutions, announced today that it has signed an OEM agreement with Datasul S.A. (Bovespa: DSUL3), a multinational corporation headquartered in Brazil. Under terms of the agreement, Datasul will private label GraphOn's GO-Global for Windows software product to Web-enable their entire portfolio of Windows-based integrated management software applications.

GO-Global is a fast, simple and affordable application delivery solution that provides instant Web-enabled, cross-platform access to centrally-running software applications from any location, platform and operating system. With GO-Global, there is no need to rewrite applications for the Web or deploy complex infrastructure such as Microsoft Windows Terminal Services or Citrix Presentation Server.

"We are very pleased to enter into this technology partnership with GraphOn which will result in direct benefits to our customers," said Edimilson Corrêa, Datasul's product and technology chief executive. "With GO-Global, our customers will be able to instantly access our software solutions from anywhere using any Web browser running under Windows, UNIX, Linux, or Mac OSX – or mobile devices running Windows Mobile or Pocket PC."

"By incorporating GraphOn's advanced server-centric technology, patented RXP communication protocol, and near-zero-footprint thin clients, Datasul has been able to eliminate the time, money and effort normally required to rewrite existing applications for the Web or port them to new computing platforms," explained Mike Ruggeri, GraphOn's regional sales manager. "And unlike other Web-enabling alternatives, Datasul will be able to retain 100% of their applications' features, functions and branding."

About Datasul
Headquartered in Brazil, Datasul employs over 3,000 professionals who provide software solutions and services to approximately 3,000 customers throughout Latin America, the United States, and Canada. The company's integrated business software solutions include enterprise resource planning (ERP), human capital management (HCM), business intelligence (BI), enterprise content management (ECM), and customer relationship management (CRM) applications. For more information, visit www.datasul.com.

About GraphOn Corporation
GraphOn Corporation is a publicly-traded company headquartered in Santa Cruz, California. For over a decade, GraphOn has been an innovator of cost-effective, advanced solutions that help customers access applications from anywhere. GraphOn's high-performance software provides fast remote access, cross-platform connectivity, and a centralized architecture that delivers a dramatically lower cost of ownership. The company's solutions run under Microsoft (MSFT) Windows, Linux and UNIX, including Sun (JAVA) Solaris, IBM AIX, Hewlett-Packard (HPQ) HP-UX, and others.
