## **GraphOn and Heset Sign Partnership Agreement to Market GO-Global Web-enabling Solution in Croatia**

### ***Thin-Client Software Reduces Cost and Complexities of Server-centric Computing***

**SANTA CRUZ, CA, USA** – August 6, 2007 – GraphOn Corporation (OTCBB:GOJO), a leading worldwide developer of thin-client application deployment and Web-enabling solutions, announced today that it has signed a reseller agreement with Heset d.o.o. to market the GO-Global software family throughout Croatia.

GO-Global is a fast, simple, and affordable application delivery solution that provides instant access to centrally-running Windows, UNIX and Linux applications from any location, platform and operating system. With GO-Global, there is no need to rewrite applications for the Web or deploy complex infrastructure such as Microsoft Windows Terminal Services or Citrix Presentation Server.

“After careful market investigation and evaluation, we determined that GO-Global is the best overall solution based on its excellent price/performance ratio,” said Heset Sales Manager Ana Berić. “The solution is very simple to implement. In less than an hour, legacy non-Web applications are available over the Internet. GO-Global integrates transparently into Windows or UNIX/Linux environments, inheriting all existing corporate security settings.”

“Heset will actively promote GO-Global to its corporate customer base in Croatia,” said Tom Castanzo, GraphOn’s Business Development Director for EMEA. “The European thin-client, server-centric computing market continues to show strong growth, and we are very pleased to announce this partnership with Heset. They will provide a strong addition to our expanding channel network.”

GO-Global is optimized for reliable, secure and scalable application delivery. For maximum performance, GO-Global publishes only the application GUI over the network, not the entire desktop. The result is near LAN-like performance, even over high-latency Internet links and other low-bandwidth connections.

#### **About Heset**

Headquartered in Zagreb, Croatia, Heset d.o.o. is a recognized consulting and implementation leader in the information and communications technologies (ICT) market. The company helps organizations integrate IT services with business goals, thereby maximizing the value of technology investments.
