Logos Management Software Web-enables Windows Applications with GO-Global from GraphOn Corp.

Server-centric Solution Eliminates ISV's Need to Rewrite Applications for Remote Access

SANTA CRUZ, CA, USA – August 20, 2007 – GraphOn Corporation (OTCBB:GOJO), a leading worldwide developer of server-centric application deployment and Web-enabling solutions, announced today that Logos Management Software has deployed GraphOn's GO-Global software to instantly Web-enable Logos' management and accounting applications.

GO-Global is a fast, simple and affordable application delivery solution that provides instant Web-enabled access to server-based Windows, UNIX and Linux applications from any location, platform and operating system. The thin-client solution is totally transparent to application users. A GO-Global Web-enabled application appears on the user's desktop exactly as though it were running locally, retaining all of its features, functions and branding.

Logos Management Software is an independent software vendor (ISV) offering a full range of Windows-based office management, accounting, and backup software applications to churches, schools, and other non-profit organizations throughout the United States and Canada.

"After extensive research, we concluded that GO-Global has the most flexibility to fit our unique needs," said Andrew Haystead, Logos' Director of Customer Service. "We'll be able to improve our customers' flexibility and efficiency by allowing them to access our programs wherever and whenever they want. They won't be tied down to time periods when they can make it to the church office to do their work. It will also be useful for our larger customers to help them communicate and work with their off-site organizations."

"Thanks to GO-Global, Logos has been able to quickly and cost-effectively Web-enable their software products without having to re-engineer or make any changes to the Windows applications," said GraphOn Regional Sales Manager Mike Ruggeri. "Logos has an outstanding reputation in their target market and we look forward to a successful business partnership."
