GraphOn Announces Channel Partnership with Open ID to Resell GO-Global Software Solution in France

GO-Global Reduces the Costs and Complexities of Thin-Client Application Deployment

SANTA CRUZ, CA, USA – August 13, 2007 – GraphOn Corporation (OTCBB:GOJO), a leading worldwide developer of thin-client application deployment and Web-enabling solutions, announced today that it has signed a reseller agreement with Open ID to market the GO-Global software family in France.

GO-Global is a fast, simple, and affordable application delivery solution that provides instant access to centrally-running Windows, UNIX and Linux applications from any location, platform and operating system. With GO-Global, there is no need to rewrite applications for thin-client or Web browser access, nor deploy complex, expensive infrastructure such as Microsoft Windows Terminal Services or Citrix Presentation Server.

“Our mission at Open ID is to improve the performance and viability of our customers’ IT activities,” said Laurent Moskala, President of Open ID. “Towards that end, we selected GraphOn’s GO-Global software because it provides a cost-effective, server-centric solution that’s optimized for reliable, secure and scalable application delivery to virtually any network-attached device.”

“We are pleased to announce this partnership agreement with Open ID,” said Tom Castanzo, GraphOn’s Business Development Director for EMEA. “As a leading IT services and solution provider, Open ID will market GO-Global to major firms as well as small- and medium-sized businesses throughout France.”

About Open ID
