GraphOn Partners with SBIM to Market GO-Global in Belgium

Thin-Client Solution Reduces Cost and Complexity of Server-Centric Computing

SANTA CRUZ, CA, USA – July 23, 2007 – GraphOn Corporation (OTCBB:GOJO), a leading worldwide developer of thin-client, server-centric application publishing and Web-enabling software solutions, today announced that it has signed a software reseller agreement with Société Belge d'Informatique Médicale (SBIM) to market the company's GO-Global software throughout Belgium.

GO-Global is the fast, simple and cost-effective application delivery solution that provides instant access to centrally-running Windows, UNIX and Linux applications from any location, platform and operating system. With GO-Global, there is no need to rewrite applications for the Web or deploy complex application delivery infrastructure such as Microsoft Windows Terminal Services or Citrix Presentation Server.

"We were searching for a thin-client solution that could lower our customers' TCO," said SBIM Technical Manager Geert Ledeganck. "We found that GO-Global reduces the costs and complexities of centralized application delivery. It is simple to install and configure, does not depend on Microsoft licensing, and provides secure, encrypted communications."

GO-Global is optimized for secure, fast, and reliable application delivery, even over high-latency Internet connections. For maximum performance, GO-Global publishes only the application interface over the network, not the entire desktop.

"SBIM is a successful, well-established provider of IT solutions to the medical sector in Belgium," said Tom Castanzo, GraphOn's Business Development Director for EMEA. "We are pleased to announce this reseller agreement which we are certain will provide the basis for a mutually-beneficial partnership."

About SBIM
With almost 20 years experience, SBIM specializes in developing and marketing administrative and technical solutions for the medical market. The company is headquartered in Charleroi, Belgium. For more information, call +32.(0).71.286222 or visit www.sbim.be.

About GraphOn
GraphOn Corporation is a publicly-traded company headquartered in Santa Cruz, California. For over a decade, GraphOn has been an innovator of cost-effective, advanced solutions that help customers access applications from anywhere. GraphOn's high-performance software provides fast remote access, cross-platform connectivity, and a centralized architecture that delivers a dramatically lower cost of ownership. The company's solutions run under Microsoft (MSFT) Windows, Linux and UNIX, including Sun (SUNW) Solaris, IBM AIX, Hewlett-Packard (HPQ) HP-UX, and others. For more information, call 1.800.GRAPHON in the USA, +44.1344.668534 in Europe, or visit www.graphon.com.
