GraphOn Expands Partnership with Sedicom to Market GO-Global in the Middle East

GO-Global Reduces Cost and Complexity of Thin-Client, Server-based Computing

SANTA CRUZ, CA, USA – August 27, 2007 – GraphOn Corp. (OTCBB:GOJO), a leading worldwide developer of server-based application deployment and Web-enabling software solutions, announced today that it has signed a distribution agreement with Sedicom Europe to distribute the GO-Global family of thin-client software solutions throughout Kuwait, Dubai, Saudi Arabia, Jordan, Lebanon, and Egypt.

GO-Global is a fast, simple, and affordable application delivery solution that provides instant access to centrally-running Windows, UNIX and Linux applications from any location, platform and operating system. With GO-Global, there is no need to rewrite applications for Web-based access, or deploy complex infrastructure such as Microsoft Windows Terminal Services (WTS) or Citrix Presentation Server.

"We have a long and successful business relationship with Sedicom throughout Europe, and we are pleased to announce this distribution agreement covering the Middle East," said Tom Castanzo, GraphOn's Business Development Director for Europe, the Middle East and Africa (EMEA).

"The GO-Global thin-client solution is becoming more and more popular in the EMEA market where it is viewed as a cost-effective alternative to WTS and Citrix," said Mazin Sahli, CEO of Sedicom Europe. "In the Middle East, we are in the market penetration stage right now with server-based computing solutions, so we are working on increasing the awareness of GO-Global while prospecting for potential customers."

Unlike WTS or Citrix which uses the RDP protocol, GO-Global uses GraphOn's patented RXP protocol which is much faster and offers greatly improved data compression. The result is near LAN-like performance, even over high latency dial-up lines and Internet connections.

About Sedicom Europe
Sedicom Europe is a value-added distributor of server-based computing products. The company offers hardware and software products that allow resellers and system integrators to provide customers additional value as part of their server-centric, thin-client solutions. For more information, call Sedicom in Kuwait at +965.75.84.742 or visit www.sedicom-europe.com.

About GraphOn Corporation
GraphOn Corporation is a publicly-traded company headquartered in Santa Cruz, California. For over a decade, GraphOn has been an innovator of cost-effective, advanced solutions that help customers access applications from anywhere. GraphOn's high-performance software provides fast remote access, cross-platform connectivity, and a centralized architecture that delivers a dramatically lower cost of ownership. The company's solutions run under Microsoft (MSFT) Windows, Linux and UNIX, including Sun (SUNW) Solaris, IBM AIX, Hewlett-Packard (HPQ) HP-UX, and others. For more information, call 1.800.GRAPHON in the USA, +44.1344.668534 in Europe, or visit www.graphon.com.
