GraphOn Signs Agreement with ZMA to Distribute GO-Global in Argentina ***Software Solution Reduces Cost and Complexity of Server-centric Computing***

SANTA CRUZ, CA, USA – July 9, 2007 – GraphOn Corp. (OTCBB:GOJO), a leading worldwide developer of server-based application publishing and Web-enabling software solutions, today announced that it has signed a software distribution agreement with Zampatti Maida & Asociados (ZMA) to resell and distribute the GO-Global family of thin-client, server-centric computing solutions throughout Argentina.

“GO-Global is a very original and useful server-based solution that will allow our customers to easily access central applications from anywhere using just about any device,” said ZMA’s Hernán Gimenez.

GraphOn’s GO-Global is a fast, simple and cost-effective application delivery solution that provides instant access to centrally-running Windows, UNIX and Linux applications from any location, platform and operating system. With GO-Global, there is no need to rewrite applications for the Web or deploy complex application delivery infrastructure such as Microsoft Windows Terminal Services or Citrix Presentation Server.

The solution is optimized for reliable, secure and scalable application delivery, even over high-latency Internet connections. For maximum performance and ease of deployment and maintenance, GO-Global publishes only the application interface over the network, not the entire desktop.

“ZMA is a successful, highly professional distributor and reseller of software products throughout Argentina,” said Mike Ruggeri, GraphOn Regional Sales Manager. “Last year, the company saw its sales grow by over 300%. We feel confident that this partnership agreement represents a sound business decision that will benefit both of our companies.”

About ZMA

Based in Buenos Aires, Argentina, Zampatti Maida & Asociados is a rapidly-growing information technology professional group representing several leading worldwide software publishers, including GraphOn, Numara, AdventNet, and ManageEngine. For more information, call +54.11.4825.1602 or visit www.zma.com.ar.

About GraphOn

GraphOn Corporation is a publicly-traded company headquartered in Santa Cruz, California. For over a decade, GraphOn has been an innovator of cost-effective, advanced solutions that help customers access applications from anywhere. GraphOn’s high-performance software provides fast remote access, cross-platform connectivity, and a centralized architecture that delivers a dramatically lower cost of ownership. The company’s solutions run under Microsoft (MSFT) Windows, Linux and UNIX, including Sun (SUNW) Solaris, IBM AIX, Hewlett-Packard (HPQ) HP-UX, and others. For more information, call 1.800.GRAPHON or visit www.graphon.com.

This press release contains statements that are forward looking as that term is defined by the United States Private Securities Litigation Reform Act of 1995. These statements are based on current expectations that are subject to risks and uncertainties. Actual results will differ due to factors such as shifts in customer demand, product shipment schedules, product mix, competitive products and pricing, technological shifts and other variables. Readers are referred to GraphOn’s most recent periodic and other reports filed with the Securities and Exchange Commission.
